IONIC CRYSTAL

HIMALAYAN SALT LAMPS

THE BEST MAGICAL SALT OF THE EARTH

Salt lamps are naturally beautiful and ambient while generating an increased balance of airborne negative ions which are scientifically proven to enhance human health, environment, and well-being. These are **hygroscopic** too, thereby reducing moisture content which airborne particulates/bacteria need to remain airborne and survive.

HOW DOES IT WORK

The heat produced by the electric bulb in lamps or by the flame in Ancient Ionic Candleholders releases large number of negative ions in the air which help balance the environment saturated with positive ions.

WHERE THIS SALT FROM

Our Himalayan Crystal Salt Lamps and Candleholders are manufactured from pure rock salt. Himalayan Salt originated about 250 million years ago. This special salt is under foot hills of Himalayan Mountains range in Asia (Pakistan) and that's obviously an oldest salt mine in the whole world.

BEST PLACES TO USE SALT LAMPS AND CANDLE HOLDERS

• Bedroom • Children room • Den • Restaurant Table • A Doctor or Hospital waiting room • A Hotel Lobby A Spa or Salon • Healing/Aroma Therapy Centre • Reiki & Yoga Centre • OR anywhere people may gather, meet, or spend extended periods of time in

Use a Himalayan salt lamp at your desk, next to your computer, on a bedside table; try them in your home and allow natural, healthful ambience to work for you. We recommend leaving a salt lamp lit 24 hours a day for best results; the lamps should be at least warm to the touch.

HEALTH BENEFITS FROM NEGATIVE IONS

- Remove bad odors & dander
- Naturally produce negative ions without creating ozone
- Enhances immune system function
- Speeds up healing of wounds
- Reduce susceptibility to colds and flu
- Increase energy level
- Remove allergens, pollutants, dust and bacteria from air.
- Alleviates symptoms of allergies & asthma
- Helps reduce the severity of migraine headaches
- Increase alertness, work productivity and concentration.
- Balance serotonin levels in the bloodstream
- Improve cognitive abilities such as thinking and learning
